SUMMARY

- Data Engineer with 3+ years of experience building scalable **data pipelines, ML models, and advanced analytics solutions** across finance, healthcare, and retail.
- Skilled in **Python, SQL, Spark, Kafka, dbt, Airflow, and cloud platforms (AWS, Azure, GCP)**.
- Proven track record delivering **ETL workflows, BI dashboards, and ML pipelines** that improved data quality, compliance, forecasting accuracy, and business decision-making.

EXPERIENCE

- **Data Engineer** Feb 2025 – Aug 2025
Wells Fargo (Contract) *Dallas, TX, Remote*
 - Built **batch and streaming pipelines** using Spark + Kafka for financial data processing and reporting.
 - Optimized **SQL queries and schemas**, reducing pipeline latency by 25%.
 - Developed **Tableau/Power BI dashboards** for real-time credit and compliance analytics.
 - Implemented **data governance frameworks** for validation, quality checks, and lineage tracking.
- **Data Engineer** Aug 2024 – Jan 2025
JPMorgan Chase (Contract) *Dallas, TX, Remote*
 - Designed **ETL workflows with PySpark, Airflow, and dbt** to process structured/unstructured financial datasets.
 - Automated **API-driven ingestion pipelines** for market and client datasets.
 - Enhanced **dbt models** to improve reporting accuracy and data reliability.
 - Partnered with analysts to deliver **BI dashboards** that cut manual reporting effort by 50%.
- **Data Scientist (ML)** May 2021 – July 2023
Vision Tree *India*
 - Developed ETL pipelines with **SQL and Spark** to integrate healthcare claims and policy datasets.
 - Built **forecasting pipelines (ARIMA, SARIMA, Temporal Fusion Transformer)** for demand and resource planning.
 - Designed **anomaly detection and fraud monitoring** workflows using ML techniques.
 - Created dashboards (Tableau, Power BI, Plotly) to visualize KPIs, predictions, and model outputs.
 - Applied **ML-driven insights** to improve healthcare resource allocation and fraud prevention.

KEY PROJECTS

- **Cross-Cloud Data Pipelines:** Built Spark + Airflow + dbt pipelines across AWS & GCP for financial analytics.
- **Governance & Monitoring System:** Implemented validation, schema checks, and alerting to ensure compliance.
- **ML Forecasting Models:** Deployed ARIMA/SARIMA/TFT models for demand planning in healthcare.
- **API Integration:** Automated ingestion of external data sources via Python APIs, integrating with BI dashboards.

TECHNICAL SKILLS

Programming: Python, SQL, Java, Scala

ML & Data Science: Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, SciPy

Data Engineering: Spark, PySpark, Flink, Kafka, Hive, dbt, Airflow, Databricks

Visualization: Power BI, Tableau, Matplotlib, Seaborn, Plotly, Excel

Cloud Platforms: AWS (S3, RDS, SageMaker), Azure (AKS), GCP (Vertex AI)

DevOps & Tools: Docker, Git, CI/CD, API Development

CERTIFICATIONS

Generative AI & Machine Learning

- AI for ALL: From Basics to GenAI Practice – **NVIDIA**
- Develop Applications with Azure OpenAI – **Microsoft**
- Prompt Design in Vertex AI – **Google Cloud**
- Introduction to Generative AI: Art of the Possible – **AWS & Microsoft**
- Finetuning Large Language Models – **DeepLearning.AI**
- Create Your Own ChatGPT-like Website with Open Source LLMs – **Cognitive Class**

Programming & Data Analytics

- Get Started Building with Power BI – **Microsoft**
- Getting Started with Databricks for Data Engineers – **Databricks**
- Programming Essentials in Python – **Python Institute**

Cloud & DevOps

- AWS Cloud Practitioner Essentials – **AWS**
- Getting Started with DevOps on AWS – **AWS**
- Docker Essentials: A Developer Introduction – **Cognitive Class**

EDUCATION

University of Texas at Arlington

Master of Science, Computer Science.

Vidya Jyothi Institute of Technology

Bachelor of Technology, Computer Science and Engineering,
